

Return the used TempTracer temperature monitors

To support sustainable healthcare ecosystems and a responsible supply chain, TSS and AstraZeneca are focused on optimizing the reuse of temperature monitors together with you.

You can help us to achieve our sustainability goal by reusing or returning the used temperature monitors by following these simple steps below:

1. Please ensure that you have uploaded the data from the TempTracer.
2. Take the downloaded TempTracer monitors to the outbound warehouse to reuse.
3. Or if you have access to stock, please contact a local courier company to arrange shipment or post the package to **TSS AB, Berzelius väg 25-27, 171 65 Solna, Sweden**. Mark the package as "recycled devices, no commercial value".

For additional product information, please visit:

Your efforts are reflected in AstraZeneca's Ambition Zero Carbon programme and the United Nations Sustainable Development Goals.

AstraZeneca's ambitious programme for zero carbon emissions from its global operations by 2025 and to ensure its entire value chain is carbon negative by 2030, brings forward its decarbonisation plans by more than a decade.

United Nations Sustainable Development Goals (SDGs)

- SDG 12: Responsible consumption and production
- SDG 13: Climate action
