

Sentinel & Sentry Manual Launch

For Diamond Shipments

The Sentinel temperature monitor with Sentry In-Transit is used for Diamond Shipments

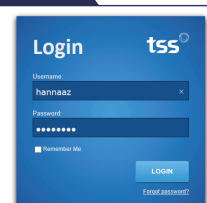

1

Collect Sentinels for shipment. Press the button to ensure **green** LED. If not green, press and hold until flashing green and release.
Keep Sentinels <30m to Sentry 600 Gateway > 15 min

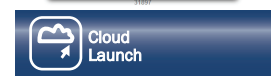

2

a. Login to az.ccis.se

b. Select "Cloud Launch"

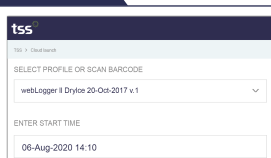

3

a. Select profile

b. Add trip data

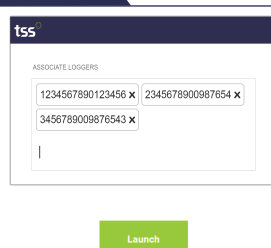

c. Scan Sentinel barcodes or type in Sentinel id's

4

a. Verify correct number of id's listed

b. Click "Launch"

5

Sentry600 In-transit must have been charged >15 hours before use

6

Check on the display power is on, and the monitor is switched on before attaching it to the pallet

7

Attach both to shipment. The Sentinel and Sentry600 In-Transit contain lithium batteries. Please follow local procedures.

Placement of temperature monitors on the product is outlined in the AZ Quality and Compliance Manual procedure 8-P27
