ASSOCIATE LOGGERS

1234567890123456 ✗ 2345678900987654 ✗
3456789009876543 ✗

Launch

5

a. Press the start button when you are ready to start recording the temperature. 3 second, LED = green
The recording immediately starts, when you press the button.

b. Attach to shipment

c. Attention. Never plug in the webLogger into the computer after launch. It stops the mission. You can check the webLogger status in TempViaNet.*
*Check the TVN pending shipment user guide in case of questions about webLogger status after launch.

Placement of temperature monitors on the product is outlined in the AZ Quality and Compliance Manual procedure 8-P27
