

# Return guide Sentry

**1**

TSS will contact you to arrange a collection of your used Sentry 600 devices. Collect them in a strong cardboard box, preferably still in its custom-made yellow box or equivalent protective packaging.

**2**

The following UN3481 label need to be attached to the cardboard box at return. If needed, you can order more labels from [customer.service@tss.se](mailto:customer.service@tss.se).

Note: If you are returning different monitors to TSS (webLogger, TempTracer, Sentinel, Sentry), you can put them in the same box. Only monitors returned for failure analysis (RMA) need to be packed separately. Please follow RMA user guide.
